

# Position Green earns top ranking on Deloitte's Fast 50 as one of Sweden's fastest-growing tech companies

November 8, 2024

Position Green, a leader in sustainability and digital ESG solutions, has been recognized as one of Sweden's fastest growing tech companies on Deloitte's Technology Fast 50 list for 2024. With a growth rate of over 1000% over the past four years, the recognition highlights Position Green's role in making sustainability central to business strategy.

"We're thrilled to be recognized by Deloitte as one of Sweden's top growth companies. It reflects the growing need for sustainability solutions that go beyond compliance and create real impact. I'm especially proud of our team, who make our progress possible every day. We look forward to continue to lead the future of sustainable business worldwide," says Daniel Gadd, CEO of Position Green.

Position Green provide a digital platform and advisory services that help over 700 both Swedish and international clients across finance, manufacturing, healthcare and energy. By turning regulatory challenges like the EU's Corporate Sustainability Reporting Directive (CSRD) into strategic opportunities Position Green supports clients in achieving greater transparency and building robust, sustainable business models. As market demand grows, Position Green is expanding across Europe and exploring new markets globally.

"It is always fascinating to see which companies qualify for the Sweden Technology Fast 50. This year's list, as usual, reflects the changes we see in society at large. This year, we have also chosen to analyze the profitability of Sweden's fastest-growing tech companies that made it onto the list. We can see a trend where profitability is higher compared to previous years", says Viktor Tjäder-Larsson, responsible partner for Deloitte Sweden Technology Fast 50.

Position Green's recent achievements go beyond Deloitte's Fast 50 list, and include being named the top SaaS growth company in Sweden by Breakit as well as being featured in Gartner's Buyer's Guide for ESG Data Management & Reporting Software. These recognitions further show Position Green's commitment to driving sustainable impact in business.
